DECLARED GOVERNANCE CONTEXT (LOCKED)

Environment: Production

Regulatory Scope: Regulated

Business Criticality: High

This context was declared prior to analysis and is immutable.

Changing context requires a new analysis and a new authority record.

AUTHORITY BASIS (STANDARD OF PROOF V2.0)

This decision is issued under Legacy Lens Standard of Proof v2.0 and Registry v2.0. Authority is granted only when system behavior is provable from source artifacts alone. Where provability terminates, authority terminates. Legacy Lens does not execute code, infer runtime behavior, or certify compliance.

Evidence is invariant; governance context does not override provability boundaries.

AUTHORITY INVOCATION

Legacy Lens authority was formally invoked for the system and scope identified below. This record constitutes an official governance act.

SCOPE

System(s): cics-banking-sample-application-cbsa-main.zip

Artifacts Analyzed: COBOL, COPYBOOK, JCL, IMS, ASSEMBLER (as applicable)

DECLARED RUNTIME CONFIGURATION ARTIFACTS

Runtime configuration artifacts may reduce missing-artifact uncertainty, but they do not convert runtime-defined semantics into provable guarantees.

DECISION

Decision Outcome: NO-GO

AUTHORITY DETERMINATION

Legacy Lens issues this decision under Standard of Proof v2.0 and the cited registry version.

Authority is granted only when behavior is provable from source artifacts alone under the declared context.

Where provability terminates, authority terminates.

Scores and exposure metrics do not determine this outcome.

BOUNDARY STATEMENT

Provability boundaries were detected that terminate deterministic decision authority under the declared context.

AUTHORITY LIMITATION

Legacy Lens does not execute code, infer runtime behavior, or certify compliance. This decision reflects only provable guarantees from source-level evidence.

SELF-VERIFICATION (OFFLINE)
